- Napomene:**
- Za naftu, naftne derivate i hidrauliku se mogu koristiti i pojedini priključci navedeni u cjenicima priključaka za niskotlačne gumene opletene cijevi za plinove, odnosno toplu vodu.
  - Ako se prilikom naručivanja ne naglasi od kojeg se materijala želi niskotlačne priključke B 16 - NO 10 biti će isporučeni oni priključci koje trenutno imamo na skladištu.
  - Kod naručivanja svih matica treba obavezno naznačiti pored navoja i promjer rupe D i visinu matice H (pritom se pripadajući OK vidi iz gornje tablice) ili za koju nogicu i namjenu su predviđene.
